

View PDF on Nuxt page

Asked 2 years, 7 months ago Modified 6 months ago Viewed 7k times

- ▲ 4 I have a Nuxt app and I want to display on a certain page e.g. /gdpr a PDF file with the GDPR policy. I tried to put the PDF in the static folder, but having something like /gdpr.pdf simply won't do.
- ▼ I couldn't find a proper way to do this without any PDF viewer plugin and the vue-pdf one has lots of problems with Nuxt.
- Any ideas or some other way of implementing this?
- vue.js pdf nuxt.js

- ▲ 7 You can simply embed your PDF in your page:
- ```
<template>
 <div>
 <embed src="/pdf/your_pdf_file.pdf" width="1440px" height="900px" />
 </div>
</template>
```
- ▼ I put my pdf file in the pdf folder in my static folder of the project.

1 ▲ haha very simply, thanks bro! – Alauddin Afif Cassandra Oct 4, 2022 at 16:52

▲ how to add tools, like download ? – Jenuel Ganawed Feb 21 at 13:59

- ▲ <template>  
 <div>  
 <embed src="/pdf/your\_pdf\_file.pdf" width="1440px" height="900px" />

0

```
</div>
</template>
```

Should be noted that if your pdf is multiple pages, this method does not work correctly on touch-screen devices. FYI. In my experience, it will render the first page of the document, but scrolling to a second page is not possible.
